Summary

I am an experienced full-stack developer specializing in JavaScript technologies, with expertise in Node.js for backend development, Vanillajs, TypeScript React, and Maplibre GL for frontend. Throughout my career, I have successfully utilized Node.js for efficient and scalable backend development, implementing best practices and ensuring robust code architecture. On the frontend, I have a proven track record of translating design concepts into visually appealing and functional applications, with expertise in responsive design, cross-browser compatibility, and performance optimization.

In addition to my technical skills, I bring a meticulous approach to documentation, utilizing JSDoc to generate precise and well-structured documentation. With proficiency in draw.io, I design app architectures and visualize complex workflows, streamlining the development process and fostering collaboration. My problem-solving abilities, attention to detail, and curiosity about communication technologies enable me to find optimal solutions tailored to each project's requirements. I prioritize careful assessment of application needs and the

selection of appropriate tools and technologies, ensuring the delivery of high-quality, scalable, and efficient solutions.

Professional Experiences

Neredekal.com / Front End Developer

July 2024 - Present

I am working in Neredekal.com as a Frontend Developer and responsible for;

- Maintaining and improving applications

Istanbul Metropolitan Municipality / Web GIS Developer

October 2021 - June 2024

I was working in Istanbul Metropolitan Municipality as a team leader of Frontend Development Team and responsible for;

- Designing the architecture of applications

- Developing web based GIS applications

- Coordination of the team and task distribution

- Public applications

  - harita.istanbul

  - eczane.ibb.istanbul/

  - zamanmakinesi.ibb.gov.tr/

- 3 Internal applications

Bitay / Full Stack Developer

May 2021 - October 2021

I was working in Bitay as Full Stack Developer and responsible for;

- Developing widget app to ease customer interaction with the product, solving potential problems and making suggestions.

- Developing admin panel for giving control over content and structure on widget app.

- Developing chat app for interacting with customers if needed.

- Developing API's to provide necessary data for these apps.

- Integrate necessary supporting systems such as Redis and DB

Vucos / Product Owner

Nov 2020 - April 2021

I was working in Vucos as Product Owner and responsible for;

- Assisting our customers to design, test and deployment of TV related products and services.

- Follow-up roadmap closely to assure launching new features on time.

- Organizing teams to assure our customers need is met.

- Mobile and Large Screen Hybrid TV product preparation.

- Knowledge about adaptive streaming technologies like HLS, HSS, MPEG-DASH etc.

Vucos / Front End Developer

Nov 2019 - Nov 2020

I was working in Vucos as Front-end developer and responsible for;

- Developing Smart TV applications for Samsung and LG using React Framework.

- Deployment of these applications to the store.

- Troubleshooting problems related to these applications.

- Testing applications on all platforms.

Side Projects

- 100times.blog

- Newsletter with Github Actions

- Chrome Extension Tab Tracker App

- UI Building Library

- UI Component Library

- Photoshop App

- Password Generator App

- Chat Application

Development Skills

- Javascript, HTML, CSS, Sass

- React, Next.js, Redux, React Router Dom, TypeScript, Npm, Webpack, Maplibre GL, Nodemailer

- Nodejs, Socket.io, Express, Nginx, Redis, Mongo

- VS Code, Git, Postman API, Jira, draw.io

- Windows, Ubuntu, Bash Terminal

- Chrome Extensions

Education

Istanbul Technical University (ITU) - Geomatics Engineer (Bachelor Degree **2019**)

Languages

	Reading	Speaking	Writing
Turkish	Native	Native	Native
English	Advanced	Advanced	Advanced
